BLAST—RadioRA® 2 Qualification Level 1

What is BLAST?

The Lutron® Basic Lighting and Sales Training (BLAST) is designed for any residential dealer or contractor who is interested in the mid-market, retrofit lighting control opportunity.

At BLAST, you will learn about:

- The "business case" for RadioRA 2 and the mid-market, retrofit opportunity
- System design and programming utilizing the RadioRA 2 Essentials software
- Integrating RadioRA 2 using third-party equipment
- Activating devices and transferring the programming

Upon completion of the course and its requirements, attendees earn access to the RadioRA 2 Essentials software that allows for system expansion of up to 100 devices.

What are the training options?

We offer two options for completing this FREE Level 1 (BLAST) qualification:

BLAST-Off is a one-day local qualification training.

BLAST-On is an online qualification training for those who are unable to attend a BLAST-Off due to location or timing.

Sign-up and requirements

BLAST-Off:

All signups for BLAST-Off are managed through Lutron's partner distribution network. Contact your local branch today or email ra2training@lutron.com to find out when a training session is happening near you.

To complete BLAST-Off training and receive software access, you must attend the full day of training.

Sign-up and requirements (continued)

BLAST-On

To complete BLAST-On training and receive software access, you must successfully complete all four steps:

1 **Pre-work consisting of seven self-paced, online modules**—To access the pre-work, create an account on the Lutron Learning Management System: lutron.learn.com.

After creating your account and receiving validation (this can take between 24-48 hours), log in to lutron.learn.com and click on Learning Plans. Enroll in the "LP 620 - RadioRA® 2 BLAST-On Training" by clicking on the green plus sign to the right of the course.

The plus sign to the left of the course will expand the window to show the pre-work modules. Pre-work modules will become active as you complete each one in sequence. The modules must be completed before attending the Capstone webinar component and taking the online exam.

Note: The final exam will include questions from each module. We recommend taking notes and/or referencing the modules during the exam.

2 **A 2½-hour live Capstone webinar to review the RadioRA 2 programming software**—A link to register for the Capstone webinar will be unlocked after the pre-work modules are complete.

Note: We recommend taking notes during the Capstone and using resources mentioned when taking the final exam.

3 **An online exam**—Upon completion of the Capstone webinar, log back in to lutron.learn.com and take the EX 102 BLAST-On exam. Participants must achieve an 80% or higher in order to pass the exam. There is a maximum of three attempts to pass. A Lutron representative will contact you if additional assistance is required.

Remember: You can refer to the pre-work modules or your notes from the modules or Capstone at any time.

4 **Purchase of a RadioRA 2 starter package (RR-SINGLE-STR-WH) or other RadioRA 2 products of equivalent value**—This purchase is required to complete BLAST-On. Submit an invoice from your local distributor to RA2BLASTOn@lutron.com.

Once your invoice has been processed, you will be pre-registered for myLutron*, where you can access the RadioRA 2 Essentials software, sales tools, online instructional videos, and more.

*Currently, only BLAST-On graduates in the U.S. and Canada will gain access to myLutron. Those graduates outside of the U.S. and Canada will receive access to the RadioRA 2 dealer site.
